General Overview: Data Plate

The Data Plate feature is use to display text data descriptions in order to assist with reports and make data tracking easier.

This document will address the unique data plate functionality for the MaxxForce® 11 and 13.

Description and Operation

The Data Plate reports stored Engine Control Module (ECM) information to help identify vehicle and engine components.

Programmable Parameters

The following programmable parameters are for display only with the Data Plate feature.

Parameter Value	Description	Possible Values	Cust Pgrm	Recommended Settings
Vehicle Identification Number (8500)	The vehicle identification number (VIN)	Alphanumeric	NO	Factory Set
Vehicle Model (8504)	The vehicle model of application (i.e. LF62700)	Alphanumeric	NO	Factory Set
Engine Serial Number (8800)	The engine serial number	Alphanumeric	NO	Factory Set
Rated Horsepower (8205)	The rated horsepower of the engine	Numeric	NO	Factory Set
Rated Engine Speed (8204)	The engine speed at which the "Engine HP Rating" (8205) occurs	Numeric	NO	Factory Set
EIM Serial Number (6601)	The serial number for the engine interface module (EIM)	Alphanumeric	NO	Factory Set
EIM Hardware Version (6602)	The hardware version of the EIM	Alphanumeric	NO	Factory Set
EIM Software Strategy Version (6603)	The software version of the EIM	Alphanumeric	NO	Factory Set
EIM Calibration Version (6604)	The calibration version of the EIM	Alphanumeric	NO	Factory Set
ACM Serial Number (1100)	The serial number of the after treatment control module (ACM)	Alphanumeric	NO	Factory Set
ACM Hardware Version (1102)	The hardware version of the ACM	Alphanumeric	NO	Factory Set
ACM Strategy (1200)	The software version of the ACM	Alphanumeric	NO	Factory Set

Parameter Value	Description	Possible Values	Cust Pgrm	Recommended Settings
ACM Calibration (1201)	The calibration version of the ACM	Alphanumeric	NO	Factory Set
EDC Serial Number (0100)	The serial number for the engine data controller (EDC)	Alphanumeric	NO	Factory Set
EDC Hardware Version (0103)	The hardware version for the EDC	Alphanumeric	NO	Factory Set
EDC Software Strategy Version (0101)	The software version for the EDC	Alphanumeric	NO	Factory Set
EDC Calibration Version (0102)	The calibration version for the EDC	Alphanumeric	NO	Factory Set

Parameter Setup

Not applicable for Data Plate.

Frequently Asked Questions

I needed to replace a control module in my vehicle. How do I update the information if it is not programmable?

An authorized dealer can update the module to the correct information.

How can I see these parameters?

An electronic service tool can be used to display these values.

Definitions/Acronyms

The following terms are referenced in this document:

Acronym	Definition
ACM	After Treatment Control Module
EDC	Engine Data Controller
EIM	Engine Interface Module
VIN	Vehicle Identification Number
